An introductory ^{workshop} session on 'how to write a research paper' was conducted in Heritage Hall on 12.9.16 at 3.30 PM. Principal, Dr. P. Biswal addressed the teachers in an objective manner.

Dr. Biswal first emphasized the importance of doing research while remaining tied to teaching at the same time. The most important aspect of writing a research paper is the paper's title. The title must speak eloquently about the contents to follow. Then the scholar must spell out the statement of the problem and how he/she approaches to attack the problem. Any contextual background is always preferred. The rationale of the scholar must be logical and should be backed by previous findings for in-depth co-relation. The scholar must mention clearly why his/her paper is something different. This can be covered under 'findings'. Then one should come to discussion and finally to conclusion.

Dr. Biswal answered few queries. Meeting ended with a vote of thanks.
